## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6/7/10 has been entered.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 8-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. Regarding claim 8, the phrase "first side", "second side", "opposite side" renders the claim indefinite because it is unclear whether "first side" is synonymous to "top side" in the specification, whether "second side" is synonymous to "bottom side" in the specification, whether "opposite side" is synonymous with "bottom side" in the specification. Appropriate clarification is required in the claim language.

Art Unit: 1795

5. Regarding claim 8, the phrase "an oxidizer guide with channels for routing the oxidizer" renders the claim indefinite because it is unclear whether the oxidizer guide is composed of channels or whether the oxidizer guide has a separate structure according to Fig. 3. Appropriate clarification is required in the claim language.

***Allowable Subject Matter***

6. Claims 8-15 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

The following is a statement of reasons for the indication of allowable subject matter:

Applicant claims a fuel cell stack comprising a distributor zone, a collecting zone, and an oxidizer guide which runs in the direction of the lengthwise channels and which is open to sides of the fuel cell stack for supplying of the oxidizer.
